Cut weeds down to size

Darlac's sickle is the perfect tool to slice through light vegetation such as thistles, nettles and briars. If you have an overgrown allotment to contend with or just patches of neglected garden, this sickle is great for slicing off the worst of the overgrowth. The sickle has a short aluminium handle and 23cm (9in) razor sharp curved blade. It weighs only 450g so is comfortable to use.

Price: About £12. It is available nationwide from all good garden centres.
