

Telescopic Fruit Picker

RRP From £39.95

Info With the fruit-picking season almost here, this product is designed to make harvesting easier. Weighing just 1.4kg (3lb), it doesn't strain your arms, and there's no need to climb ladders because it extends to a handy 3m (10ft). It's easy to use, too - simply hold the picker in place and squeeze the grip to work the cutter until the fruit falls directly into the large, washable bag.
